Esteban Santiago Pizzani

Hello, I'm Esteban, a 19 years old student who is very compromised with his work. I am currently studying physics in the Universidad de Buenos Aires (UBA). I learned how to code on Platzi, and I keep taking their courses to improve my abilities and learn new technologies like JavaScript, React and Tailwind.

Experience

I have relatively little experience working in a development team as a frontend developer, however, I am used to work remote with a team; thanks to my previous experience as a video editor while making whiteboard animation videos.

Main frontend developer

April, 2022

At Istmo Consultores I Argentina (remote)

I was in charge of redesigning their main website from scratch. I made the design on Figma, and coded the whole website with a mobile first design scope in mind.

Freelancer at Fiverr

June, 2020

At Fiverr I Worldwide (remote)

I create whiteboard video animations as a freelancer at Fiverr. Since I began, I have completed more than 90 jobs for different clients all over the world, and they have left me a 5 stars reputation as a seller thanks to their reviews.

Frontend developer

Current

For my personal projects

While doing this I have created very interesting projects, like a fully working e-commerce about guitars, a website that showcases science videos, and my own personal portfolio website.

Whiteboard video animator

September, 2021

At Universidad Austral I Argentina (remote)

I worked making an MBA online course for that university. The course contains 36 videos in total, which I had to deliver in a timespan of 2 months.

EDUCATION

In this section I will mention the most relevant courses that I have taken on Platzi, besides, you can consult all the courses that I have completed on my LinkedIn profile.

Curso de React.js:
Patrones de Render y Composición
Platzi

2022

Learned about the state, composition, rendering, effects, hooks and custom hooks, reducers, local storage, portals and HOC in React. Applied all that in a todos app project.

Curso Práctico de JavaScript:
Platzi

2021

On the JavaScript course, I learned about the scope, functions, conditions, cycles, arrays, objects, promises and asynchronous functions.

Curso de Responsive Design:
Maquetación Mobile First
Platzi

2021

With this course I sharpened my skills while coding websites with a mobile first focus. Learned how to use media queries, relative measures, flexbox and grid on CSS.

Curso Definitivo de HTML y CSS:
Platzi

2021

Here I learned and reinforced concepts, methods, good practices and accessibility measures that should be used while writing code on HTML and CSS.

Skills

HTML | CSS | JavaScript | SASS
or SCSS | Tailwind | React | Vite |
NodeJS | Webpack | NPM | Git |
GitHub

Languages

Spanish: Native
English: Bilingual
German: Basic

Interesting project
